

# Additions to Magnolia Bibliography

by John M. Fogg, Jr.

The members of our Society who possess a complete file of our publication, the first issue of which appeared in 1964, have access to a rather comprehensive literature concerning Magnolia and related genera.

The purpose of this article is to indicate that there is at least one other source which our members might consult if they wish to extend their coverage of articles on Magnolia: this is the *Bulletin of the Morris Arboretum* of the University of Pennsylvania.

During the formative years of our Society and prior to the publication of our first *Newsletter* (as it was then called) about 15 articles on Magnolia appeared in the *Morris Arboretum Bulletin*, of which I was then the editor. A complete list of these articles follows. I have ascertained that the Arboretum has an adequate supply of the numbers of the *Bulletin* in which these articles appeared. Anyone interested in obtaining any of these may do so by sending one dollar for each issue to the Morris Arboretum, 9414 Meadowbrook Avenue, Philadelphia, Pennsylvania 19118.

## ... Short Takes

• We apologize for leaving out the ad for Ken Durio's Louisiana Nursery in the Spring 1981 issue. We've got it back in the current one.

• Ken's wife Belle on March 14 was installed as president of the Louisiana Society for Horticultural Research and the day's program covered magnolias and azaleas in native, species, and hybrid.
